Language: Other - Chinese: 60% (+3% per level)
Motorcycles & Snowmobiles: 70% (+4% per level)
Hovercycles, Skycycles & Rocket Bikes: 80% (+3% per level)
Character notes (continued)
Assassin costs one Related choice.
Knife/Energy Rifle/Energy Pistol are automatic;
choose two other W.P.s of either family.
Automatic dodge is separate from ordinary
dodge: use P.P. bonuses and+1 at
levels1/3/6/9/12; no ordinary dodge bonuses or
attack cost. Resolve context from source79.
Endurance: can lift/carry four times an ordinary
person of equivalent strength/endurance and
last ten times longer before exhaustion. Can
remain fully alert for five days(120 hours);
ordinarily needs only three hours of sleep.
These are source traits, not automatic activity
simulation. Sleep and drugs: cannot fall asleep
without a sedative or tranquilizer. The bio-comp
can counter tranquilizers/stimulants and ready
the Juicer within15 seconds(one melee); the first
recovery melee uses half normal combat
bonuses. Chemical dependence and
jumpy/anxious behavior remain character traits.
Healing: heals four times the normal rate. Pain
does not stop function until Hit Points fall to5 or
less, when the Juicer collapses into a
bio-comp-induced healing trance/coma. The+20
coma/death save is included separately, without
automatic injury/healing resolution. Lifespan:
chemical augmentation is fatal after five years
plus4D6 months as a Juicer. Ordinary saving
throws/healing do not avert this decline;
source80 also notes the severe Resurrection
success penalty. Detox and its
replacement/retained-skill consequences remain
separate saved-class revision work. Speed trait:
after a short run, leaps can cover30ft
horizontally or20ft vertically; standing distance is
half. These source distances remain descriptive.
Bio-comp/bio-data implants, drug harness and
supply are fixed class gear. Start with no other
cybernetics; detox/class revision and other
Juicer variants remain separate. Military Pilot
Related+5 applies to the catalog entries
explicitly headed Military; other catalog
prerequisites and source restrictions remain
guidance. Generic Human P.P.E. and full wider
catalogs remain unresolved; no other racial
base is substituted. (Rifts - Ultimate Edition,
class rules printed pp. 79, 80, 81).
Acrobatics: Primary percentage measures
sense of balance. Automatic kick at first level
does 1D8 S.D.C. damage. Basic climb and
prowl have no level growth; they yield to the
separately learned full skill, which receives the

Skills and character notes

source bonus instead. No fear of heights. (Rifts - Ultimate Edition, pp. 81).

Climbing: Climb sheer surfaces with appropriate tools and techniques; rappelling includes ascending and descending with ropes. Roll every 20 feet; two consecutive failures cause a fall. (Rifts - Ultimate Edition, pp. 81).

Land Navigation: Stay on course by landmarks, distance estimates, trail marking and observation. Does not require Literacy or Mathematics; symbolic map reading carries 20% penalty. Travel and drift remain descriptions. (Rifts - Ultimate Edition, pp. 81).

Recognize Weapon Quality: Examine weapon durability, reliability, makers, wear, damage, modifications, copies, stolen identifiers and fair prices. Halve proficiency when the weapon is seen without physical examination. (Rifts - Ultimate Edition, pp. 81).

Wilderness Survival: Find water, food, shelter and help when stranded in forests, deserts or mountains. Also listed in Espionage; retain one acquired skill identity. (Rifts - Ultimate Edition, pp. 81).

Prowl: Move quietly and carefully using balance, positioning, low visibility and crawling. Failure reveals the character; successful stealth may permit a sneak attack. Listed in both Rogue and Physical; use one identity and the Rogue entitlement for these two classes. (Rifts - Ultimate Edition, pp. 317, 321).

Detect Ambush: Recognize terrain and locations suitable for ambush; this does not identify individual prowling enemies. (Rifts - Ultimate Edition, pp. 308).

Intelligence: Recognize and analyze enemy information, troops, operations and evidence; estimate ranges, threats and strategic importance. Failed evidence remains inconclusive or misinterpreted. (Rifts - Ultimate Edition, pp. 309).

Camouflage: Conceal a person, equipment, vehicle or fixed position using natural or artificial materials. Larger preparations take time; also covers concealing traps. (Rifts - Ultimate Edition, pp. 314).

Motorcycles & Snowmobiles: Pilot motorcycles, dirt bikes, mopeds, snowmobiles, jet sleds, miniature ATVs and similar small vehicles. (Rifts - Ultimate Edition, pp. 319).

Hovercycles, Skycycles & Rocket Bikes: Pilot specialized hovercycles, rocket bikes, skycycles and small jet-powered hover vehicles. Source stunts, jumps and dodges have no special skill penalty; distances and movement remain descriptive. (Rifts - Ultimate Edition, pp. 318).

Natural psionics: Not psychic; potential roll None; save target 15 (attribute/class bonuses apply separately).

0 choices remaining; 0 categories selected

Ultimate Edition pp. 345, 348.
Body flip/throw: Augmented Strength: damage is
descriptive; see source guidance.; 1 action(s).
Ultimate Edition pp. 345, 348.
Combat conditions (Ultimate Edition pp. 341,
344–348, 361):
Shooting contexts are training examples; actual
weapon modes, burst lengths, ammunition and
capacity remain pending.
Gun shooting excludes P.P., general
hand-to-hand strike and strength damage
bonuses. Assassin's explicit gun-strike gains
apply separately from W.P.; bursts halve only
the W.P. contribution. Untrained shooters
cannot make aimed shots.
Gun dodge requires seeing the attacker and
knowing the shot is coming; subtract 10 within
10 feet or 5 within 50 feet. Athletics and
hand-to-hand dodge bonuses do not apply to
gunfire or energy blasts (p. 361).
Augmented Strength: Use the Augmented P.S.
table for action damage; these examples are
descriptive. Power punches/kicks use two
actions. At P.S.24 they inflict1 M.D.;25-27:1D4
M.D.;28-30:1D6 M.D.;31-40:2D4 M.D. Higher
ranges have their own restrained/full/power
entries. S.D.C. strength bonuses are not added
to M.D. For other attacks and targets, follow the
source table and weapon description rather than
normal-human damage examples.
Other special hand-to-hand moves remain
pending.
Hand to Hand: Expert: Body flip/throw costs one
action; victim loses initiative and one attack. A
successful roll with impact halves the damage.
Hand to Hand: Expert: Power Kick takes two
actions, doubles base kick dice and adds
P.S./Hand to Hand damage bonuses once
(user-confirmed interpretation). It cannot
combine with Leap Kick; knee and
non-damaging moves have no power variant.

Skills and character notes

Surface swimming covers three times P.S. in
yards/meters each melee round for P.E. minutes
before fatigue. No attribute, S.D.C. or combat
bonus is granted. A failed roll leaves the
swimmer afloat without covering distance. Three
consecutive failed rolls cause submersion and
drowning unless rescued. Non-powered M.D.C.
armor swimming requires staying afloat,
depending on armor weight; no buoyancy
formula is provided. Power armor swimming is
permitted. Surface swimming has the fatigue
rate of running and is medium to heavy exertion,
especially fast or long distances. Conditional
storm and armor checks are shown separately;
they do not automatically resolve simultaneous
conditions or other armor movement penalties.
Surface swimming: Routine pace until fatigue;
distance uses current effective P.S., duration
uses current effective P.E.
Saving fields show reviewed bonuses.
Save vs illusions: +0; Save vs disease: +3; Save
vs pain: +0; Save vs fatigue: +0; Save vs mind
control: +6; Save vs mind-altering drugs: +3
The P.E. magic bonus does not apply to
demonic curses or possession.
High-M.E. possession bonuses are restricted to
specified supernatural beings; they are not
granted to this path.
